

Information for Authors of IEEE Power & Energy Society Transactions Papers

The IEEE Power & Energy Society (PES) publishes three quarterly Transactions publications: *IEEE Transactions on Energy Conversion*, *IEEE Transactions on Power Delivery*, and *IEEE Transactions on Power Systems*. The areas covered by each are enumerated below. A complete list of topics under each area can be found in Part 2 of the PES Author's Kit.

IEEE Transactions on Energy Conversion includes contributions in the following areas: Electric Machinery, Energy Development and Power Generation, Nuclear Power Engineering, and Stationary Battery.

IEEE Transactions on Power Delivery includes contributions in the following areas: Insulated Conductors, Power System Communications, Power System Instrumentation and Measurements, Power System Relaying, Substations, Surge Protective Devices, Switchgear, Transformers, and Transmission and Distribution.

IEEE Transactions on Power Systems includes contributions in the following areas: Power Engineering Education, Power System Analysis, Computing, and Economics, Power System Dynamic Performance, Power System Operations, and Power System Planning and Implementation.

Paper Preparation: Basic guidelines for preparing papers for the Power & Energy Society are provided in Part 4 of the Author's Kit. Information is given regarding desktop publishing format, type sizes, and typefaces. Style rules are provided that explain how to handle equations, units, figures, tables, references, abbreviations, and acronyms. Sections are also devoted to the preparation of acknowledgments, references, and authors' biographies. Part 4 of the Author's Kit is itself an example of the desired layout for papers and can be used as a Microsoft Word template. Transactions papers are limited to eight pages. Papers exceeding eight pages will be subject to mandatory page charges.

Submission Information: An author submits a manuscript by uploading a word processing file (.doc, .rtf, or .ps) of the paper directly onto Manuscript Central, a site on the World Wide Web where papers can be accessed by the Transactions Editors-in-Chief, Editors, and Reviewers. It will be converted to a PDF file by the system. (*It is recommended that the PDF file be under 1 MB. Papers exceeding this file size may require a longer review time.*) See Part 2 of the Author's Kit for complete instructions.

Upon Acceptance: Only after a paper is accepted for publication is the author required to send via traditional mail or delivery methods the following forms and files to the IEEE PES Executive Office, 445 Hoes Lane, Piscataway, NJ 08855-1331 USA:

- Word processing or LaTeX file of the formatted paper with graphics incorporated.
- TIFF, EPS, or PS file of each graphic.
- High-quality printouts of each graphic.

In addition, the author will be required to submit a completed IEEE Copyright Form electronically via Manuscript Central.

Please note that a printout of the PDF file that was reviewed will be used as the official hard copy of the paper.

A proof of the paper as it will appear in the printed publication will be sent to the author for brief review and approval.

Discussions and Closures: The IEEE PES Executive Office handles the submission of discussions and closures. Please see Part 5 of the Author's Kit for complete submission requirements and deadlines. It is recommended that discussions and closures be limited to one formatted page including figures and tables, though contributions of up to 1500 words will be accepted. Discussions and closures may be rejected if they exceed the page limit and they must be submitted to the IEEE PES Executive Office by the deadline date. The IEEE PES Executive Office will forward copies of all written discussions to the corresponding author of the subject Transactions paper and will request that a written closure be submitted. Closures must be submitted within three weeks (five weeks outside of North and Central America) of the request. If there is no response by the deadline, it will be assumed that no closure will be supplied.

Power Engineering Letters: This section of the Transactions offers a vehicle that speeds publication of new results, discoveries, and developments. The section affords authors the opportunity to publish contributions within a few months of submission to ensure rapid dissemination of ideas and timely archiving of developments in our rapidly changing field. Original and significant contributions in applications, case studies, and research in all fields of power engineering are invited. Of specific interest are contributions defining emerging problems and special needs in specific areas. Authors are encouraged to submit contributions to the Letters Section offering new insight to established techniques, concepts, and methodologies in electric power engineering. Such contributions are distinctly different from discussions of papers recently published in the Transactions, in that the former seek to broaden the scope, and point to potential enhancements to existing and established technologies. Submissions are limited to two formatted pages. Those exceeding this limit will not be reviewed. An author submits a manuscript by uploading a word processing file (.doc, .rtf, or .ps) of the letter directly onto Manuscript Central where it can be accessed by the Power Engineering Letters Editor-in-Chief, Editors, and Reviewers. It will be converted to a PDF file by the system. See Part 2 of the Author's Kit for complete instructions.

Copyright: It is the policy of the IEEE to own the copyright to the technical contributions it publishes on behalf of the interests of the IEEE, its authors, and their employers, and to facilitate the appropriate reuse of this material by others. To comply with United States copyright law, authors are required to sign and submit a completed IEEE Copyright Form. This form returns to authors and their employers full rights to reuse their material for their own purposes.

Voluntary Page Charges: After a manuscript has been accepted for publication, the author or his/her company or institution will be requested to pay a charge of \$110 per page, for the first eight published pages, to cover part of the cost of publication. Payment will not be obligatory nor a prerequisite for publication. The author will receive 100 free reprints without covers if the charge is honored.

Mandatory Page Charges: The author or his/her company or institution will be billed \$110 per each page in excess of the first eight published pages. Payment of these charges is not negotiable or voluntary. Further, submission by the author of his/her manuscript to these Transactions signifies acceptance of the requirement to pay mandatory page charges. The Publisher holds the right to withhold publication of the current submission or any future submissions from the author if this charge is not honored.

Color Charges: Color reproduction is expensive and all charges for color are the responsibility of the author. There will be a charge of \$125 for each figure; this charge may be subject to change without notification. In addition, there are printing preparation charges which may be ESTIMATED as follows: color reproductions on four or fewer pages of the manuscript: a total of approximately \$1000; color reproductions on five through eight pages: a total of approximately \$2100; color reproductions on nine through 12 pages: a total of approximately \$3200, and so on. Payment of fees on color reproduction is not negotiable or voluntary, and the author's agreement to publish the manuscript in the Transactions is considered acceptance of this requirement.
