

Students: Energize Your Future!

Join the IEEE Power Engineering Society for FREE!

With over 22,000 members from around the globe representing every facet of the electric power industry, PES is in the forefront of the rapidly changing technologies that affect everyone's future.

LEARN about current research and applications of recent technologies such as wind, photovoltaics, fuel cells, distributed generation, flexible AC transmission, and more.

STAY INFORMED concerning the latest developments in traditional technologies and the developing opportunities created as deregulation impacts the power industry.

NETWORK with experienced professionals in all aspects of the industry at local, regional and international meetings. Save really big on conference registration fees, too. Some are even free!

***If you have not previously been a PES member, we'd like to introduce you to the benefits of membership by offering the FIRST YEAR FREE.
To be eligible for this offer you must be an IEEE Student member.***

If you are an IEEE student member, and have already set up your IEEE Web Account, visit www.ieee.org/renewal. (To set up your web account visit www.ieee.org/web/web/accounts).

- ***If you have not yet renewed your membership*** for the current billing year, please renew first. (Note that after Sept. 1, you must renew for the next calendar year before taking advantage of this offer.) You can add PES membership as you renew. Use web promo code "**LXMGF77804**" to take advantage of the free PES membership offer

- ***If you have already renewed***, select "Add Services" to add PES membership. Use web promo code "**LXMGF77804**" to take advantage of the free PES membership offer.

If you are not an IEEE student member take advantage of this offer by joining IEEE as a student member on-line at www.ieee.org/join today! Join PES at the same time. Use web promo code "**LXMGF77804**" to take advantage of the free PES membership offer.

Energize YOUR Future with PES!
