

IEEE Transactions on Power Delivery – Call for Associate Editor Applications

Due to the recent increase in the number of paper submissions, the IEEE Transactions on Power Delivery (TPWRD) is looking to expand its pool of Associate Editors (AE). Qualified candidates in all subjects in the scope of TPWRD are encouraged to apply (see: <https://cmte.ieee.org/tpwrd/>). Special needs are for the following subjects:

- 1) Cable technologies (thermal analysis, cable insulation, connectors, etc.)
- 2) Utility-Grade Power Electronics (HVDC, FACTS, VSC, LLC, MMC, etc.)
- 3) Condition monitoring of power equipment. Of particular interest experience with artificial intelligence and machine learning.
- 4) Power system protection (all areas)
- 5) PMU technologies
- 6) Power system reliability

We are looking for researchers with experience publishing and reviewing TPWRD papers. Industry researchers, women, and other under-represented minorities are particularly encouraged to apply. Candidates from the IEEE Region 10 are specially sought.

If interested, please send the Editor-in-Chief (fdeleon@nyu.edu) an email stating your interest together with a two-page CV containing: paper publication record, reviewing experience for TPWRD, and (current and past) editorial work for any organization.

Francisco de Leon, Editor-in-Chief
IEEE Transactions on Power Delivery
