IEEE Transactions on Energy Conversion
The scope of this journal is focused on research and operation of electric power generating facilities (along with their conventional, nuclear, or renewable sources) for the safe, reliable, and economic generation of electrical energy for general industrial, commercial, public, and domestic consumption, and electromechanical energy conversion for the use of electrical energy.

IEEE Transactions on Power Delivery
The scope of this journal is focused on the safe, reliable and economic generation, transmission, distribution, conversion, measurement and control of electric energy, including the developing of engineering standards, the providing of information and instruction to the public and to legislators, as well as technical scientific, literary, educational and other activities that contribute to the electric power discipline or utilize the techniques or products within this discipline.

IEEE Transactions on Power Systems
The scope of this journal is focused on serving the whole Power System community, including researchers, practitioners, educators and students, by publishing and disseminating insightful research results of lasting value. Topics of interest include stability, control, operations, planning, economics and regulation of electric energy systems.

IEEE Transactions on Smart Grid
The scope of this journal is focused on disseminating the results of research on smart grid that relates to energy generation, transmission, distribution and delivery. Topics of interest include design, implementation and evaluation of energy systems that include smart grid technologies and applications.

IEEE Transactions on Sustainable Energy
The scope of this journal is focused on disseminating results of research on sustainable energy that relates to, arises from, or deliberately influences energy generation, transmission, distribution and delivery. The journal will publish original research on theories and development on principles of sustainable energy technologies and systems, and design, implementation and evaluation of power systems that are affected by sustainable energy.

Attention Authors - Get Published!
IEEE Power & Energy Society Transactions Papers

The IEEE Power & Energy Society is inviting authors to submit papers for any of our five quarterly Transactions publications:

IEEE Transactions on Energy Conversion
IEEE Transactions on Power Delivery
IEEE Transactions on Power Systems
IEEE Transactions on Smart Grid
IEEE Transactions on Sustainable Energy

To submit a transaction paper, please visit mc.manuscriptcentral.com/pes-ieee
