

IEEE SMART GRID Cybersecurity Workshop 2019

InterContinental Buckhead, Atlanta GA - December 12-13

attend.ieee.org/smartgridcybercon

Conveniently co-located, and held directly after NERC's Critical Infrastructure Protection Committee (CIPC) December 2019 meeting. This 1½ day workshop will focus on providing an industry update of the key challenges and latest industry developments.

The main objective is to provide a forum where these increasing cybersecurity threats can be discussed and allow participant networking with your industry colleagues and cybersecurity experts.

SESSIONS include:

- Threats and Risks
- Technical and Regulatory Standards
- Supply Chain
- Risk Management, Resilience, and Holistic Security
- Workforce
- Academic Research and NextGen Solutions

In addition, for the first time, this year's event will include [The Smart Grid Cybersecurity Village](#) a combination vendor exhibition and Red Team/Blue Team Exercise. From practitioners and engineers to regulators and vendors, this fast-paced workshop has something for everyone!
