2003–2017 Index to Feature Articles
IEEE Power & Energy Magazine
Vols. 1–15

This index covers all feature articles that appeared in IEEE Power & Energy Magazine during 2003–2017. The Author Index contains the primary entry for each article, listed under the first author’s name. The primary entry includes the coauthors' names, the title of the article, and its location, specified by the publication abbreviation, year, month, and inclusive pagination. The Subject Index contains entries describing the article under all appropriate subject headings, plus the first author’s name, the publication abbreviation, month, and year, and inclusive pages. Note that the article title is found only under the primary entry in the Author Index. (Index entries have been compiled from the 2003 through 2017 year-end indexes.)

Each index entry contains a link (blue text) to allow you to view the article’s abstract in IEEE Xplore®. PES Members may access the full article provided they have an IEEE web account. Non-Members who wish to purchase the full article may do so by following the instructions on the site.
