

Inaugural Issue of the IEEE Open Access Journal of Power and Energy: Welcome Note

IT IS with great pleasure, PES welcomes your interest to the subscription free publication in the field of power and energy: IEEE OPEN ACCESS JOURNAL OF POWER AND ENERGY (OAJPE). Throughout the world, the outcome of research funded through public finance is expected to be freely available to the member of the society. Such expectation very much resonates the core mission of PES publication: dissemination of high-quality research outcome to the wider power and energy community through rigorous peer review process. Electric energy is at the center stage of the modern digitized and decarbonized world. It has now become an integral pathway of modern living and empowerment of people. Educating the community by bringing the latest development in power and energy technology is an effort from the PES, such as free and open access publications.

OAJPE is a technical journal focusing on the academic research, development, planning, design, construction, maintenance, installation and operation of equipment, structures, materials and power systems for the safe, reliable sustainable and economic conversion, generation, transmission, distribution, storage, and usage of electric energy, including its measurement and control. It is fully electronic, open access publication. It is publication by volume only (one volume and single issue a year).

The journal endeavors to have quick first decision and about ten weeks submission to publication. Each article

will be thoroughly reviewed by at least two independent expert reviewers, thoroughly assessed by the editor for a well-informed recommendation. The peer review team comprises of experts of diversity: gender and geography. The editorial board is led by the Editor-in-Chief Prof. Fangxing “Fran” Li, Fellow of the IEEE, The University of Tennessee. The journal is also pleased to have the promotion and outreach leadership from Prof. João P. S. Catalão, University of Porto, Portugal. Professors Li and Catalão welcome articles in frontier topics from the authors from the diverse sectors: academia, industry, and government laboratory. Unlike other open journals, OAJPE has restriction on maximum page number (eight in first submission and ten on final acceptance) despite being a digital only publication. OAJPE encourages the authors to use the IEEE Dataport for archiving model, data, and additional results. OAJPE will also help authors from economically challenged circumstances for subsidizing the article processing charge (APC) for the first three years.

On behalf of the Editorial Board, Editor-in-Chief, Promotion and Outreach Editor, and other publication volunteers of the journal, we welcome the authors and readers of this open access publication.
