Best Papers and Star Reviewers

REGULAR PAPERS

Modeling of Surface Permanent Magnet Motors With Cogging and Saturation Effects Included
M. G. Angle, J. H. Lang, J. L. Kirtley, Jr., S. Kim, and D. Otten

The Impact of Voltage Regulation of Multiinfeed VSC-HVDC on Power System Stability
R. Shah, R. Preece, and M. Barnes

Torque Improvement and Cost Reduction of Permanent Magnet Machines With a Dovetailed Consequent-Pole Rotor
J. Li, K. Wang, and C. Liu

A Linear Extrapolation-Based MPPT Algorithm for Thermoelectric Generators Under Dynamically Varying Temperature Conditions
B. Bijukumar, A. G. Kaushik Raam, S. I. Ganesan, and C. Nagamani

Development of an External Rotor V-Shape Permanent Magnet Machine for E-Bike Application
Y. Yang, M. M. Rahman, T. Lambert, B. Bilgin, and A. Emadi

Reduced Capacitance Battery Storage DC-Link Voltage Regulation and Dynamic Improvement Using a Feedforward Control Strategy
D. Bazargan, B. Bahrani, and S. Filizadeh

An Optimization Framework for Dynamically Reconfigurable Battery Systems
N. Lin, S. Ci, D. Wu, and H. Guo

An Online Diagnostic Method for Rotary Diode Open-Circuit Faults in Brushless Exciters
Y. Wu, B. Cai, and Q. Ma

Improvement of Tubular Linear Oscillating Actuators by Using End Ferromagnetic Pole Pieces
J. Sun, C. Luo, and S. Xu

Distinct Bearing Faults Detection in Induction Motor by a Hybrid Optimized SWPT and aiNet-DAG SVM
F. B. Abid, S. Zgarni, and A. Braham

Integration of Iron-Loss Resistance Into Dynamic Models of 2 × 3-Phase Hybrid-Excited Synchronous Machine
S. Gradev and H.-G. Herzog

A Study on Vibration Characteristics of Brushless DC Motor by Electromagnetic-Structural Coupled Analysis Using Entire Finite Element Model
S. Cho, J. Hwang, and C.-W. Kim

A Robust Deadbeat Finite Set Model Predictive Current Control Based on Discrete Space Vector Modulation for a Grid-Connected Voltage Source Inverter
H.-C. Moon, J.-S. Lee, and K.-B. Lee

Equivalent Circuits for Single-Sided Linear Induction Motors With Asymmetric Cap Secondary for Linear Transit
D. Zeng, G. Lv, and T. Zhou

Improving the Impedance-Based Stability Criterion by Using the Vector Fitting Method
M. K. Bakhshizadeh, F. Blaabjerg, J. Hjerrild, J. Kocewiak, and C. L. Bak

Thermal-Impact-Based Protection of Induction Motors Under Voltage Unbalance Conditions

Simple Spec-Based Modeling of Lithium-Ion Batteries
F. Kazhamiaka, S. Keshav, C. Rosenberg, and K.-H. Pettinger

(Contents Continued on Page XXXX)
SoH-Aware Charging of Supercapacitors With Energy Efficiency Maximization .......................................................... H. Li, J. Peng, Y. Zhou, J. He, Z. Huang, L. He, and J. Pan 0000
Computationally Efficient Design and Optimization Approach of PMs-SynRM in Frequent Operating Torque-Speed Range ........................................................................................................ C. López-Torres, A. García, J.-R. Kiba, G. Lux, and L. Romeral 0000
Ship-to-Shore Versus Shore-to-Ship Synchronization Strategy .......................................................................................... R. Smolenski, G. Benysek, M. Malinowski, M. Sedlak, S. Sysná, and M. Jasinski 0000
Analytical Model of Slotless Brushless PM Linear Motors Considering Different Magnetization Patterns ................................................. A. Rahideh, A. Ghaffari, A. Barzegar, and A. Mahmoudi 0000
Implementations and Evaluations of Wind Turbine Inertial Controls With FAST and Digital Real-Time Simulations .................. X. Wang, D. W. Gao, J. Wang, W. Yan, W. Gao, E. Muljadi, and V. Gevorgian 0000
Suppressing the Thrust Ripple of the Permanent Magnet Linear Synchronous Motor With Different Pole Structures By Setting the Modular Primary Structures Differently ..................................................... X. Huang, Z. Qian, Q. Tan, J. Li, and B. Zhou 0000
Magnetization and Demagnetization Energy Estimation and Torque Characterization of a Variable-Flux Machine ................................. A. Takbashi and P. Pillay 0000
Analytical Computation for AC Resistance and Reactance of Electric Machine Windings in Ferromagnetic Slots .............................................. S. Xu and H. Ren 0000
Distributed Hybrid Secondary Control for a DC Microgrid via Discrete-Time Interaction .......................................................... X.-K. Liu, H. He, Y.-W. Wang, Q. Xu, and F. Guo 0000
A Flux-Based Differential Technique for Turn-to-Turn Fault Detection and Defective Region Identification in Line-Connected and Inverter-Fed Induction Motors .................................................. H. Dehghan, F. Hashighoo, and S. M. A. Cruz 0000
Analytical Model of Small Hydropower Plant Working at Variable Speed ......................................................................................... D. Borkowski 0000
Average-Value Modeling of Diode Rectifier Systems Under Asymmetrical Operation and Internal Faults ........................................ S. Ebrahimi, N. Amir, Y. Huang, L. Wang, and J. Jatskevich 0000
Secure Loss of Excitation Detection Method for Synchronous Generators During Power Swing Conditions ...................................... I. Kiae, S. Loftfard, and A. Bose 0000
Numerical Stiffness Analysis for Solid Oxide Fuel Cell Real-Time Simulation Applications ................................................................. R. Ma, Z. Li, E. Breaz, B. Pascal, and F. Gao 0000

SPECIAL SECTION ON EMERGING ELECTRIC MACHINES AND DRIVES FOR SMART ENERGY CONVERSION

GUEST EDITORIAL

SPECIAL SECTION PAPERS
A Novel Zero-Sequence-Current-Based Dual-Stator Biased-Flux Machine .......................................................... T. Sheng and S. Niu 0000
Optimal Design of Permanent Magnet Linear Synchronous Motors at Multispeed Based on Particle Swarm Optimization Combined With SN Ratio Method .......................................................... F. Dong, J. Zhao, J. Song, Y. Feng, and Z. He 0000
Design of a Superconducting DC Demonstrator for Wind Generators ........................................................................................ Y. Liu, J. Ou, F. Schreiner, M. Lao, M. Noe, and M. Doppelbauer 0000
Design and Analysis of a New Enhanced Torque Hybrid Switched Reluctance Motor .......................................................... J. Zhu, K. W. E. Cheng, and X. Xue 0000
Design of High Efficiency Wound Field Synchronous Machine With Winding Connection Change Method ......................... M.-S. Lim and J.-P. Hong 0000
A Linear Laminated Cylindrical Transverse Flux Machine for Use With a Free Piston Engine .................................................. J. Wang and N. J. Baker 0000
A HESM-Based Variable Frequency AC Starter-Generator System for Aircraft Applications .......................................................... Z. Zhang, Y. Liu, and J. Li 0000

(Contents Continued on Page XXXX)
Evaluating Alternative Linear Vernier Hybrid Machine Topologies for Integration Into Wave Energy Converters .............................................................. 0000
N. J. Baker, M. A. H. Raihan, A. A. Almoraya, J. W. Burchell, and M. A. Mueller

A New Hybrid Permanent Magnet Synchronous Reluctance Machine with Axially Sandwiched Magnets for Performance Improvement .............................................................. 0000
W. Zhao, H. Shen, X. Fan, D. Chen, and X. Wang

Research of Cryogenic Permanent Magnet Synchronous Motor for Submerged Liquefied Natural Gas Pump .............................................................................................. 0000
C. Guo, S. Huang, J. Wang, and Y. Feng

Design of an Axial-Flux PM-Assisted Claw-Pole Generator Based on an Equivalent Magnetic Circuit Model .............................................................. 0000
C. Ye, X. Liang, F. Xiong, J. Yang, W. Xu, and Y. Liu

High-Efficiency Dual Output Stator-PM Machine for the Two-Mode Operation of Washing Machines .............................................................. 0000
J.-W. Kwon and B.-i. Kwon

Design and Optimization of Traction IPMSM With Asymmetrical Damper Bars for Integrated Charging Capability Using Evolutionary Algorithm .............................................................. 0000

Novel Dual-Stator Machines With Biased Permanent Magnet Excitation .............................................................. 0000
H. Yang, S. Lyu, Z. Q. Zhu, H. Lin, S. Wang, S. Fang, and Y. Huang

Design and Analysis of a New Bipolar-Flux DSPM Linear Machine .............................................................. 0000
H. Fan, K. T. Chau, L. Cao, and C. Jiang

A Nine-Phase Permanent Magnet Electric-Drive-Reconstructed Onboard Charger for Electric Vehicle .............................................................. 0000
F. Yu, W. Zhang, Y. Shen, and J. Mao

Design and Optimization of a Novel Slot-PM-Assisted Variable Flux Reluctance Generator for Hybrid Electric Vehicles .............................................................. 0000
X. Zhao and S. Niu

Investigation of Spoke Array Permanent Magnet Vernier Machine With Alternate Flux Bridges .............................................................. 0000
X. Ren, D. Li, R. Qu, Z. Yu, and Y. Gao

Thrust Ripple Reduction in Permanent Magnet Synchronous Linear Motor Based on Electromagnetic Damping-Spring System .............................................................. 0000
Z. He, F. Dong, J. Zhao, L. Wang, J. Song, and X. Song

Loss Calculation and Thermal Analysis for Nine-Phase Flux Switching Permanent Magnet Machine .............................................................. 0000
M. Cheng, J. Wang, S. Zhu, and W. Wang

Analysis of Thrust Performance of a Dual-Mover Linear Vernier Machine With Horizontal-Magnetized PM Arrays .............................................................. 0000
Y. Zhou, R. Qu, C. Shi, and Y. Gao

Analysis of a Novel Consequent-Pole Flux Switching Permanent Magnet Machine With Flux Bridges in Stator Core .............................................................. 0000
Y. Gao, D. Li, R. Qu, H. Fang, H. Ding, and L. Jing

A Quasi-Three-Dimensional Magnetic Equivalent Circuit Model of a Double-Sided Axial Flux Permanent Magnet Machine Considering Local Saturation .............................................................. 0000
W. Tong, S. Wang, S. Dai, S. Wu, and R. Tang

A Novel Computational Method of Skewing Leakage Reactance for a Doubly Skewed Rotor Induction Motor .............................................................. 0000
X. Bao, J. Fang, C. Di, and S. Xu

Speed Regulation System of a Flux-Modulated Permanent-Magnet In-Wheel Motor Based on Sliding Mode Control and Adaptive Notch Filter .............................................................. 0000
Y. Fan, Q. Zhang, W. Wang, and X. Zhou

Current Vector Control Strategy in a Dual-Winding Fault-Tolerant Permanent Magnet Motor Drive .............................................................. 0000
J. Zhu, H. Bai, X. Wang, and X. Li

On-Line Inter-Turn Short-Circuit Fault Diagnosis and Torque Ripple Minimization Control Strategy Based on OW Five-Phase BFTHE-IPM .............................................................. 0000
R. Cui, Y. Fan, and C. Li

Flux-Weakening Control Combined With Magnetization State Manipulation of Hybrid Permanent Magnet Axial Field Flux-Switching Memory Machine .............................................................. 0000
G. Yang, M. Lin, N. Li, G. Tan, and B. Zhang

A New Diode-Clamped Multilevel Inverter With Balance Voltages of DC Capacitors .............................................................. 0000
S. Shi, X. Wang, S. Zheng, Y. Zhang, and D. Lu

Improved Sensorless Phase Control of Stand-Alone Brushless Doubly-Fed Machine Under Unbalanced Loads for Ship Shaft Power Generation .............................................................. 0000
W. Xu, D. Dong, Y. Liu, K. Yu, and J. Gao

Maximum Efficiency Control of PMSM Drives Considering System Losses Using Gradient Descent Algorithm Based on DC Power Measurement .............................................................. 0000
A. Balamurali, G. Feng, C. Lai, J. Tjong, and N. C. Kar

Comparison of Surface Permanent Magnet Axial and Radial Flux Coaxial Magnetic Gears .............................................................. 0000
M. C. Gardner, M. Johnson, and H. A. Toliyat

Comparative Design and Analysis of New Type of Flux-Intensifying Interior Permanent Magnet Motors With Different Q-Axis Rotor Flux Barriers .............................................................. 0000
X. Zhu, W. Wu, S. Yang, Z. Xiang, and L. Quan

Emerging Electric Machines and Drives — An Overview .............................................................. 0000
C. Liu

2018 INDEX .............................................................. Available online at http://iieeexplore.ieee.org
