

**IEEE Power Engineering Society
Entity Annual Report**

2014

Entity: Marine Systems Coordinating Committee

Chair: Paul Bishop

Vice-Chair: Dwight Alexander

Secretary: Lyndsay Garrett

1. Significant Accomplishments:

None

2. Benefits to Industry and PES Members from the Committee Work:

Keeps open line of communications amongst the various technical committees and working groups dealing with issues of electric power generation, distribution and utilization. The Marine Systems Coordinating Committee coordinates with other committees of the PES, other IEEE societies and committees, other technical organizations, and government agencies responsible for the application of power and energy at sea. The areas of coordination include Electric Ships and Marine Platforms, Marine Wind, Wave, and Tidal Systems, Marine Transmission and Distribution, Marine Grounding and Safety, and related Environmental Impact areas.

3. Benefits to Volunteer Participants from the Committee Work:

Provides a forum for the relatively small community working power and energy at sea.

4. Recognition of Outstanding Performance:

Nothing to report.

5. Coordination with Other Entities (PES Committees, CIGRE, standards, etc.):

Nothing to report.

6. New Technologies of Interest to the Committee:

Nothing to report.

7. Significant Plans for the Next Period:

The current vice-chairman plans to organize a conference call with the last know members and discuss the path moving forward. We will make a recommendation following that.
